# Remediation

These presentations has been created to help acquaint you with Remediation Techniques.

Each one explains a specific method that may help you learn more quickly and easily.
The David Program

What is Remediation?

It's QUESTION TIME!!
Remediation Techniques...

Remediation is the process of framing material in different modalities to help the student with memory and understanding....

Remediation does not rely on other people or extended time. It consists of aids used by the student to enhance the learning process.

What are modalities?

Modalities are ways of getting information.

We probably all use these techniques…

- Very few people can use all modalities equally.
- Everyone will tell you…

  – I'd rather watch a movie than read the book

  or

  - I'd rather do it than read about it

  or

  - I'd rather see the directions first

# These are considered learning preferences....

- However some people have SO much difficulty with a specific modality that it takes much longer for them to understand material presented in that way.
- Consequently, they are diagnosed with a disability.

Disabilities come in various forms

- But the essential definition, the essence of the difficulty,
- Is the inability to understand material
- Or to explain material in a specific modality

In order to be a disability…

- The difficulty must create a functional limitation…..

In order to survive educationally,

- These individuals must use a specific means of learning
- Sometimes they have to change the format of the information
- This does not mean they cannot understand the material
- It means that they do not digest the material or cannot explain the material in a specific modality
At other times...

- The difficulty pertains to the SPEED the individual processes material
- Processing speed most often affects individuals with ADHD or with reading
- However, it can also affect individuals who have problems in math or writing

It means

- They work slowly….

The following Power Point Presentations

- Are meant to help you understand some techniques that can be used to help.
- These techniques are helpful for all students.

However

Some of the techniques are MANDITORY

For students who have a learning disability.
